

Selection Criteria – GIPE25

Below are the selection criteria that the Organizing Committee of GIPE25 will adopt if the number of applications for participation in the exchange exceeds the available spots, which is 50 participants:

- The number of available spots is divided as follows: 30 participants from Italian universities, of which 10 from the University of Trieste, and 20 participants from German universities.
- Participation is only open to university students and PhD candidates.
- The Organizing Committee will strive to ensure gender equity in participation in the event. As described in the previous points, perfect parity may not be reached depending on the number of applications received.

Reading motivation letters is a fundamental part of the selection process.

The following factors will be evaluated in the motivation letters:

- Interest in the topics covered in the Plenary Sessions.
- Interest in speakers of the Plenary Sessions.
- Interest in the research and scientific activities at the University of Trieste.
- Interest in one or more of the laboratories scheduled for visits.
- Scientific interest in the city of Trieste and the surrounding areas.
- Desire to take advantage of GIPE25 as an opportunity for networking and to pursue the mission of AISF (<https://ai-sf.it/about/>).

Please note that the Executive Committee will oversee the selection process and will supervise its various phases. The contents of this document are approved by both the GIPE25 Organizing Committee and the AISF Executive Committee.

The AISF President
Alessandro Terranova
